-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Receipt of the papers filed on October 12, 2005, is acknowledged. Applicant has elected species a, claims 49 and 50. Claims 51-60 are withdrawn from consideration.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 49 and 50 are rejected under 35 U.S.C. 102(e) as being anticipated by Eldridge et al (6,110,823).
4. The Eldridge et al patent is directed to contact structures. The contact structures are formed by bonding a free end of a wire to a substrate, and subsequently overcoating the wire with a least one layer of material. See the abstract. These are the basic steps recited in instant claim 49. Figure 10K illustrates one of the several embodiments disclosed by Eldridge et al. One end 1086a of a wire having a first end and a second end is bonded to a surface of substrate 1076. This corresponds to the "providing" and "bonding" steps of claim 49. A layer of dielectric material (1094) is applied. This corresponds to the "forming" step of claim 49. A layer of conductive material (1096) is then deposited over the wire. This corresponds to the "forming" step of claim 50. As indicated in the abstract and column 1, lines 26-42, the method is for

forming a plurality of connection. All limitations recited in claims 49 and 50 are taught by Eldridge et al.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Khandros et al (5,806,181) is directed to contact carriers. Marumo et al (5,525,911) is directed to a tester card with coaxial probes. Khandros (5,476,211) is directed to a method of manufacturing electrical contacts. Hadwin et al (4,739,259) is directed to a telescoping pin probe.
